QUICK CONNECTOR SERIES

MODEL BQC-SRS-008

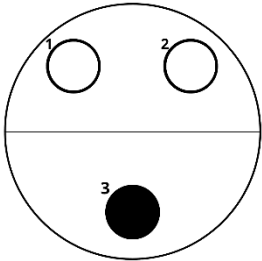

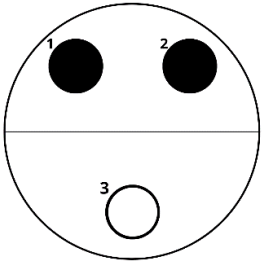

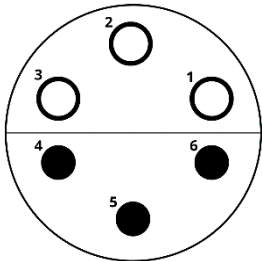

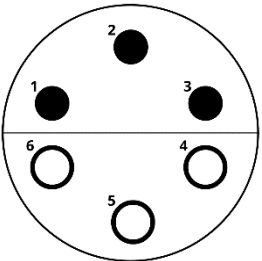

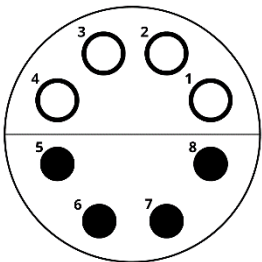

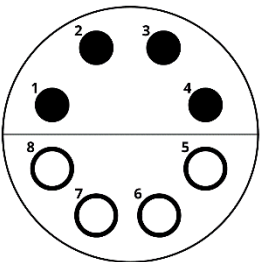

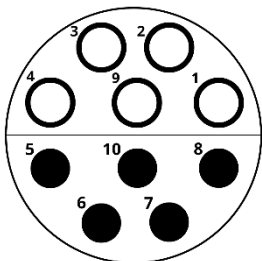

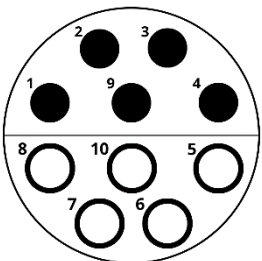

The Quick Connector Series, model BQC-SRS-008, is a line of connectors and cables developed by BMPTECH, designed for integration into any underwater equipment and systems. This series offers various configurations, including straight or 90° angle options, with or without a flange, and comes in versions with 3, 6, 8, 10, and 12 pins. Its structure is made of 316L Stainless Steel, ensuring high corrosion resistance and withstanding pressures up to 4,500 meters in depth.

The Quick Connector Series was designed and manufactured to simplify operations and prevent damage caused by misuse, ensuring greater durability and reliability in underwater applications. As the name suggests, its design was inspired by Quick hydraulic connectors, which eliminate the need for threading and use a spring-and-sphere system. This mechanism makes the connection faster and more practical, providing a safer, more efficient operation. The springs are made of 316L Stainless Steel, while the spheres are made of Delrin®.
